HEALTH ADVISORY

This is an official

CDC Health Advisory

Distributed via Health Alert Network

February 26, 2008, 20:15 EST (08:15 PM EST) CDCHAN-00270-08-02-26-ADV-N

Important Safety Information --

Revised Directions for Using Rabies Immune Globulin (Human), HyperRAB™ S/D in Fixed Needle 2 mL Pre-filled Syringe

The Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA) have been notified by Talecris Biotherapeutics, Inc. that its Rabies Immune Globulin (Human), HyperRAB™ S/D in fixed needle 2 mL pre-filled syringe does not address all dosing situations. Specifically, the fixed needle (22 gauge, 1.25 inch) and the absence of graduations on the 2 mL pre-filled syringe do not permit administration of the recommended dose of Rabies Immune Globulin (Human), HyperRAB™ S/D in one or more of the following situations:

- o A dose < 2 mL is required (e.g. for pediatric use);
- o A dose < 2 mL must be injected over multiple sites; or
- An alternate needle (different length or gauge) is required based on the patient (adult or child), wound or site of injection.

Three lots of HyperRAB™ S/D have been manufactured with the 2 mL pre-filled syringe configuration (see Table below):

Lot Number Expiration Date Size/Container NDC Number 26N87R1 Jan-26-2009 2 mL pre-filled syringe 13533-618-03 **26N88K1** Jan-26-2009 2 mL pre-filled syringe 13533-618-03 **26N9HP1** Feb-18-2010 2 mL pre-filled syringe 13533-618-03

Healthcare providers may continue to administer HyperRAB™ S/D supplied in the 2 mL pre-filled syringe by following the "Revised Directions for Use" that are packaged with these lots. The full "Revised Directions for Use" of these lots is available on-line:

http://www.talecris.com/us/documents/FINAL_FDA_Approved_Revised_Directions_for_Syringe_Use__21 __FEB-08.pdf. Talecris has discontinued manufacturing the HyperRAB™ S/D fixed needle, 2 mL pre-filled syringe.

For additional information regarding this product, please contact Talecris on-line at www.talecris.com, or call 919-412-1030, or toll free at 1-800-520-2807.

Human rabies PEP (post-exposure prophylaxis) is recommended when potentially infectious material (e.g. saliva) from a rabid animal is introduced via a bite, or comes into direct contact with broken skin or mucous membranes. More detailed information regarding evaluation for and administration of PEP is available at http://www.cdc.gov/mmwr/preview/mmwrhtml/00056176.htm.

For more information about rabies and its prevention, contact the North Dakota Department of Health at 1-800-472-2180.

Categories of Health Alert messages:

Health Alert conveys the highest level of importance; warrants immediate action or attention.

Health Advisory provides important information for a specific incident or situation; may not require immediate action.

Health Update provides updated information regarding an incident or situation; unlikely to require immediate action.

##This Message was distributed to State and Local Health Officers, Epidemiologists, State Laboratory Directors, PHEP Coordinators, HAN Coordinators and Public Information Officers as well as Public Health Associations and Clinician organizations##

You have received this message based upon information contained within our emergency notification database.

If you have a different or additional e-mail or fax address that you would like to be used, please contact the

Health Alert Network program at your State Health Department.
